

OUTDOOR LIVING, REDEFINED.

2022 COLLECTION

FAMILY OWNED
MADE IN MINNESOTA

OUTDOOR LIVING, REDEFINED.

For nearly 100 years...

Borgert has been family owned, made in the USA and proud to be a Minnesota manufacturer. We are among one of the first manufacturers of interlocking concrete paving stones in the US. Our line of products include pavers, slabs and retaining walls. We offer a wide range of colors, textures and sizes to create your dream project.

Have too much hardcover on your property? Our line of permeable interlocking pavers offer the solution so you can add on to your home or build that additional structure while maintaining environmental integrity.

Borgert Products cares about quality and we choose to use granite aggregates in all our products and we are the only manufacturer in the Midwest who uses granite aggregates.

Why Granite?

Hardest aggregate next to diamonds which means:

- It doesn't absorb the the color thus providing long-lasting vibrant color for many years
- Resistant to freeze/thaw so does not absorb moisture making the paver more durable
- It's an angular aggregate creating a stronger bond with the cement and color which is part of the paver components.

WHAT'S INSIDE MATTERS...

Natural. Hardest. Granite... that is what makes our products the strongest.

Lets create together. Build on family time and memories. We welcome you to our family and together let's bring your vision to life.

Respect • Integrity • Gratitude

BORBERT PRODUCTS

COMES WITH A PEDIGREE.

Family owned and operated, Borgert Concrete Products, Inc. was established in 1923 by Lawrence A. Borgert in East St. Cloud, MN. In 1953, Lawrence's son, Kenneth J. Borgert, took over the business and relocated it to its current location in St. Joseph. As sole owner of Borgert Products, since 2006, I am proud to uphold the same values and traditions of quality products and service unmatched in the industry just as my Grandfather and Father did. In 99 years, we have survived some challenging times which has made us a strong leader in our industry today. We started out manufacturing block and precast and have evolved into Interlocking Concrete Paving Stones, Retaining Walls and Slabs, with 2022 marking the 45 year anniversary of manufacturing paving stones. Thanks to the creativity of our people and our engineering, we continue to design new and improved products, providing our customers better selections to build their dream landscapes.

Ultimately, our Company's success is due to the hardworking team of people at Borgert Products. We are fortunate to have skilled and knowledgeable people who work hard to produce quality products, with impeccable service and commitment to our customers. In the 99 years that Borgert has been in business, many changes have occurred and I know that the founders of our Company would be as proud as I am for where we are today.

A handwritten signature in dark ink that reads "Susan M. Borgert".

CEO

Quality, Compassion and Respect, Honesty, and Empowerment.

“We have been using Borgert Products for many years, and I have to say their products have significantly helped us grow into the thriving business we are today.

- Zach P.

“Love using Borgert products, great quality and styles. And if you need anything they are there for you in a snap!

- Ben F.

“From Old World to contemporary, Borgert has a product to suit ALL of our clients' outdoor environment needs.

- Kit O.

SMOOTH

TEXTURED

A high-angle photograph of a stone patio. The patio features a central circular area made of large, rectangular stone tiles in shades of beige and light brown. This central area is bordered by a ring of smaller, square-shaped stones. The entire patio is surrounded by a bed of multi-colored gravel. In the top-left corner, there are two small, dark green shrubs. In the bottom-left corner, there are two small, spiky green plants. A black metal fence is visible on the right side. The word "KASTLE FLATS" is printed in the top right, and "TEXTURED" is printed in the bottom right.

7x7

STRASSEN® SERIES TUMBLER PAVING STONES

Strassen® Cracovia

Strassen® Bavaria

If you're looking for a more subtle and natural feel, our tumbled paving stones are your answer. These pavers have a weathered appearance that give a sense of history and elegance. Yet they perform just as well as our other products. Tumbled paving stones are a tasteful option that provide a legacy of unrivaled strength and style for your walkways, patios and driveways.

Your vision, brought to life.

STRASSEN® BAVARIA

STRASSEN®

CRACOVIA

Minnesota River

Grand Canyon

Iron Range

North Shore

Sterling Gray

Going back to the Stone Age when people's ideas of building were somewhat limited, Borgert Products created a simple, yet durable eye-catching system. Our tumbling process creates a sculpted appearance to each paver and our carefully formulated new colors will take you back to Medieval times. In addition, this line comes in sizes configured to create full circles, half circles or arches. A unique feature of our circle stones is that one side has a more textured edge and the other is softened, use whichever fits your taste. This system protects your investment by ensuring performance in its simplicity.

DRENA™ SERIES PERMEABLE PAVEMENTS

DrenaPave™

DrenaMontage™

When you're looking for a hard outdoor surface for your patio, walkway, or driveway, but have concerns about hard cover, then our permeable pavement system is the right choice. This product allows water to filter through it easily, so you can be confident that you're helping conserve our ecosystem. With Borgert, you can support a clean, healthy environment and create a distinctive, beautiful outdoor space.

Your vision, brought to life.

Permeable Pavements Require Maintenance & Engineering

DRENA MONTAGE™

DRENA™ SERIES

DRENAPAVE & DRENAMONTAGE

Minnesota River

Sterling Gray

Borgerts' Drena™ Series is a permeable pavement system perfectly designed for patio, walkway or driveway applications. If you are increasing the size of your current home or wanting to build an outbuilding, Drena™ Series is the answer for meeting local permits where hard cover is an issue. Recharge the groundwater and keep dirty stormwater out of our lakes and streams. DrenaPave allows you to be environmentally responsible for future generations.

The Strassen Wall provides the look of old weathered stone, with four sizes available. Add charm and elegance where you need a small retaining wall. This is the only wall that gives you the flexibility you need to create a unique wall with non-conventional lines. For added elegance, you can easily build a freestanding wall that can include a sitting area, steps and/or pillars.

For a cleaner more contemporary look, Strassen II is untumbled and available in three colors as noted on opposite page.

Installation Advantage – PanoMur lightweight units have a large hollow core, unique SecureLug™ connection and tapered sides.

These features allow maximum flexibility, ease of installation and cost savings while maintaining high structural integrity for both gravity and geosynthetic reinforced walls. PanoMur units are textured with a curved or straight split face. Unit shapes and sizes are balanced to provide a natural profile – complementing any design or style construction. PanoMur is manufactured in a variety of solid and blended earth tone colors to enhance any natural surrounding.

MADERA WALL

Iron Range

Minnesota River

North Shore

Sterling Gray

This unique retaining wall design that has five different sizes and two heights is called Madera. It is hard split then aged to give it the natural stone effect. It can be designed for freestanding or gravity walls – two functions in one. The most unique aspect of this wall is that there are no mechanical connections such as lips or pins – meaning no extra costs or hassles. This wall will give you more choices than any other wall on the market. The units are available in two heights, 3" and 6" and range in length from 8" to 28". Because of the wall's unique configuration, it makes it easy to create a wall with multiple sizes.

COLOR SELECTION

SELECTING COLORS - Colors are shown as accurately as possible. Due to the nature of the product, color preference and variables in print reproduction, colors will not match exactly. Make final color selection from actual samples.

For best blend results always select from multiple cubes.

CHOOSING BLENDS - Borgert manufactures pavers and walls in various blend colors that consist of either two or three colors. When choosing a blend, it is important to keep in mind that some of the pavers will be dominant in one of the colors and some will be a combination of the colors that are in that particular blend. (i.e., Minnesota River is a blend consisting of Chamois, Brown & Charcoal - some pavers will be entirely Chamois, some pavers will be entirely Brown, some will be entirely Charcoal, and others will be a combination of the two or three of these colors.)

RESOURCE GUIDE - for installation, packaging and more design pattern options request Borgert's resource guide.

Colors are shown as accurately as possible. Due to the nature of the product, color preference and variables in print reproduction, colors will not match exactly. Make final color selection from actual samples.

THE BEST SYSTEM. THE BEST VALUE.

DURABILITY

The industry standards for Interlocking Concrete Pavers are 8,000 psi and no more than 5% absorption. Borgert pavers exceed these standards giving them an excellent wearing course. The combination of high psi, low absorption and the addition of color throughout means **QUALITY** pavers that will last for years to come.

FLEXIBLE SYSTEM

Bedding sand worked up between the pavers when they are compacted creates the “**INTERLOCK**”, thus a flexible pavement that is resistant to heaving in freeze/thaw conditions. If there is settling in the pavement it can be easily repaired by taking up the pavers reworking the base and putting the same pavers back in place – no unsightly patchwork.

KEY TO SUCCESSFUL INSTALLATION

As with any pavement, a proper **BASE** is critical to the performance of the pavement. With Interlocking Concrete Pavement, the difference is there needs to be an **EDGE RESTRAINT**.

IMPORTANT NOTE

Refer to Borgert’s Product Resource & Installation Guide or the DIY brochure for complete details on installation.

Permeable Interlocking Concrete Pavement is the same principal with the exception of the type of paver and the base is open graded aggregates.

BORGERT TECHNICAL SCHOOL

In support of our industry, Borgert created the Borgert Technical School (BTS) Installer Certification Course. The two day course includes hands-on training which makes it the best technical school in North America. We offer classes in both Interlocking Concrete Pavement (ICP) and Permeable Interlocking Concrete Pavement (PICP) installation for residential applications. The contractors who attend the course(s) are given a test which is administered by a third party. All passing attendees are given a certificate and listed on our website. Go to borgertproducts.com for the current listing.

WHAT YOU SHOULD KNOW ABOUT INTERLOCKING CONCRETE PAVEMENT

MAINTAIN

Borgert pavers provide a durable yet decorative pavement - two big pluses. Like anything that is for outdoor use, they require a little care and maintenance. Clean pavement with a mild soap in the fall and spring or use cleaners specifically made for concrete pavers. Check with Borgert Products or your hardscape supplier for what products they recommend. Consider sealing driveways for more protection from street deicing chemicals.

EFFLORESCENCE

A white haze known as efflorescence is a natural occurring process in concrete. Technically known as calcium hydroxide, it can come from a number of sources and appears as a white film when carried to the surface by moisture. It may appear randomly or in certain areas and is more pronounced on darker colors. The good news is efflorescence does not affect longevity or structural integrity of the pavers. Although unsightly, in many cases it is scoured off during installation when compacting the pavers. It can also be removed using specialty cleaners, made for interlocking concrete paving stones. Otherwise, it will typically lessen or dissipate over time with rain, snow and wear. Because efflorescence can be a natural by-product of cement hydration, its presence is not indicative of a flawed or defective product. Efflorescence cannot be prevented, so as with all other manufacturers, this condition is not a warranty issue.

POLYMERIC HAZE

Interlocking concrete pavement (ICP) does not require a jointing material other than sand. Poly haze can happen if it is not used properly and should not be confused with efflorescence. Since the use of poly sand is not an installation requirement, Borgert Products accepts no responsibility in the event of hazing. We suggest you contact your contractor or the manufacturer of the polymeric sand for their suggestions concerning their products.

SNOW, ICE AND DEICERS

Our pavers and walls are more than beautiful. They have the durability to withstand the harsh winters of the Midwest and, when properly installed, snow removal is no problem...either by shovel, snow blower or plow.

Our pavers have a surface that is slip and skid resistant even when wet. Ice, on the other hand, can be slippery and common sense should be used to prevent slips and falls. We recommend sand for traction, as it can be applied liberally and as needed. Clean, untreated sand has no corrosive effect on concrete pavers and it can be swept into the paver joints or removed by conventional sweeping or vacuuming.

Concrete pavers are robust in resisting the effects of deicing chemicals. We have manufactured pavers that have been exposed to salt for over 40 years! Nevertheless, deicing chemicals can be harmful to the pavers. If using a deicer, the ICPI recommends a NaCl sodium chloride. We recommend against the use of other types, including products that contain a blend of chemicals. Pavers exposed to any deicing chemicals must be properly cleaned and maintained. We recommend cleaners designed for concrete paving stones. Check with Borgert Products or your hardscape supplier for what product they recommend.

For industry information concerning maintenance, efflorescence, deicing chemicals and installation guidelines visit www.icpi.org.

For technical information and complete product data, see Borgert's Product Resource & Installation Guide.

RESIDENTIAL WARRANTY

LIMITED WARRANTY FOR INTERLOCKING CONCRETE PAVERS IN RESIDENTIAL APPLICATIONS AND PERMEABLE CONCRETE PAVERS IN RESIDENTIAL APPLICATIONS.

Borgert Products, Inc. is pleased to provide this lifetime warranty on the structural integrity of its paving stones to the original purchaser for residential applications. A residential application is limited to a driveway, patio or similar use for a single-family residence. The original sales receipt is required for all warranty claims. Borgert Products has a minimum of one year from the time it receives notice to make a determination on a warranty claim. If Borgert Products approves the claim, it may at its option either replace the affected pavers or refund the original purchase price of the pavers to the original purchaser. Color matching is not guaranteed and replacement labor for removal or reinstallation is not included in this warranty. This warranty does not cover normal wear and tear, accidental damage or damage caused by improper installation or abuse such as chipping, breakage, overloading, uneven bedding, abrasion, etc. Efflorescence is not a manufacturing defect and is not covered by this warranty. This warranty is also void if the pavers are not installed using installation methods approved by Borgert Products, Inc., or if the pavers are damaged due to failure to clean and maintain them properly. Please see www.icpi.org for more information regarding installation and maintenance of pavers. Borgert Products, Inc. shall not be liable for incidental, punitive, exemplary, indirect or consequential damages, or lost profits arising under or relating to the purchase and use of its products. This is the only warranty provided by Borgert Products, Inc. Borgert Products, Inc. disclaims all other warranties, expressed or implied.
